

Xm radio is a vital part of the new millenium. Any attempt to restrict their ability, would be a sure fire way to make the radio industry, be the agressor to a fight that should not take place. Satelllite radio, is given the appropriate authority by the first ammendment, to provide free speech to those who want to listen. Apparently, the radio industry, its lobbyists, and those else in the know, that satelllite radio, will make them conform to more stringent competition, from somebody else. Competition is good for everybody, it keeps people more honest!!
